Statement

I am a Web Developer with my primary experience being in JavaScript and the MERN Stack using Agile development methodologies. I am amazed at the versatility and creative power of Node.js and NPM. Nothing is as satisfying as building a working app from an idea, a text editor, some research, and a lot of problem solving. I seek a role as a Developer at a company where I can satisfy my need to create.

Skills

MERN Stack, Node.js Servers, React, MySQL, Bootstrap, AJAX, jQuery, Git, REST APIs,
Team Management, Project Management, Training/ Teaching, Communication

Projects

Underground Movie Bunker | https://github.com/imjvdn/DUproject1 | https://imjvdn.github.io/DUproject1/
- UMB is a website that is designed for movie lovers. The end user can enter the name of any movie they like and quickly receive reviews, cast and crew information, plot summaries and other information.
- My core responsibilities this project included linking the website to the APIs from Giffy and the Online Movie Database.
- JS6, Bootstrap, Giffy API, OMDB API

Clicky Game | https://github.com/JBrozinski/clickyGame | https://clickygame-du.herokuapp.com/
- This game will test you memory. Try to click each image in the array without clicking the same one twice. The images will be shuffled everytime one is clicked.
- This was a solo project.
- React

Train Schedule | https://github.com/JBrozinski/trainSchedule | https://jbrozinski.github.io/trainSchedule/
- This website allows the user to keep a schedule of train departure times. Add a train, it's initial departure time, and the frequency of departures, and that train, and its future departure times, will be displayed on the schedul.
- This was a solo project.
- JS6, MySql Database
